Elegant ThermoFibra Infinity

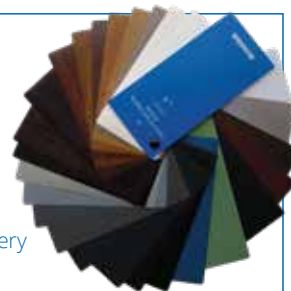

TECHNOLOGY, DESIGN, AND
PERFORMANCE AT THEIR FINEST

Elegant ThermoFibra Infinity takes innovation a step further. By incorporating ThermoFibra directly into the sash, it replaces the traditional steel reinforcement, reducing the weight by 30% while substantially improving thermal insulation and weathertightness performance. When combined with the Forthex-reinforced frame, Elegant ThermoFibra stands proudly as the market's only completely steel-free sash solution—and it is 100% recyclable!

This breakthrough also makes it possible to reduce the glazing flange from 9 to 7 mm, giving any room a beautifully minimalist and design-led aesthetic. With sleeker, more modern profiles, the final result is a truly unique and stunning architectural style.

45 COLOURS AND 4 FINISHES

Deceuninck offers an extensive palette of colors and premium finishes to beautifully complement every architectural style.

¿Why Elegant Thermofibra?

Our unwavering commitment to comfort, sustainability, and energy efficiency makes us true experts in crafting high-performance windows and doors.

Discover everything our systems deliver in terms of superior insulation, outstanding performance, and elegant finishes, and find the perfect match for your home among our extensive customization options.

Energy savings

PVC is a material with excellent insulating properties. Thanks to this, energy savings are guaranteed and CO2 emissions to the atmosphere are prevented.

Maximum insulation

Feel proud of your home and enjoy your family. Our systems not only provide wellbeing and design, they also offer the security and comfort that we all deserve!

Acoustic protection

Enjoy peace and quiet whenever you need it. Innovating to create comfort is our priority; we create spaces where you can enjoy an ideal environment for rest and relaxation.

Security and comfort

Protect yourself and your loved ones with our high-performance systems, and you'll achieve the perfect environment inside your home. Adverse weather conditions will no longer be a problem and won't affect your home's comfort.

100% recyclable

Deceuninck supports the circular economy. We recycle used windows and convert them into new raw material for our products. Let's contribute together to a more sustainable future.

High glazing capacity from 22 mm to 67 mm

Thermal transmittance

Uf 0.85 (W/m²·K)

Sash width

85 mm

Frame width

76 mm

Reinforcements

ThermoFibra in sash, Forthex in frame

Air permeability

Class 4

Acoustic attenuation

Rw = 48 (-1;-3) dB

Wind resistance

Class C5

Watertightness

Class E2100

Colors and finishes

Wood tones, industrial, solid and metallic
